Alumawood® Shade Structures

## **PART SHADE. FULL SHADE. TOTAL COMFORT.**

Alumawood® shade structures offer two distinct product lines that allow you to find the balance of style and comfort that is right for you.

**Laguna Lattice** lends an air of sophistication and charm to your home's exterior, and helps you reduce your exposure to the sun by 40 - 60% without screening out refreshing breezes.

**Newport Solid Roof** shade structures provide you and your family with maximum protection. It's a perfect choice when you want an outdoor living area shielded from the sun, rain, snow, or other elements.

## **IT'S NEVER BEEN THIS EASY TO ENJOY THE LOOK OF WOOD.**

With the embossed surface of an Alumawood® shade structure, you'll enjoy the beauty of a richly textured wood grain finish — with a fraction of the maintenance and upkeep. That's because, unlike wood, Alumawood® shade structures won't crack, peel, warp, or rot. They're also termite-proof, don't burn, and never need painting.

In addition, our new Aluma-Shield<sup>SM</sup> paint system with TEFLON® surface protector repels dust, dirt, oil, and stains, making it easier than ever to keep your structure looking pristine and new. It also greatly reduces corrosion from the sun, salt, pollution, and the elements.

With an Alumawood® shade structure, you get the best of both worlds: the beauty of wood and the convenience of a highly durable, low-maintenance aluminum surface.

## **YOU'LL REST EASIER UNDER AN ALUMAWOOD® SHADE STRUCTURE.**

Why? Because we offer one of the strongest and most thorough paint warranties in the business. Not only are you covered by an established, stable company, but your warranty is also transferable — which provides additional value if you decide to sell your home.
